# Mitternight Contributes to Keeping Alabama Beautiful.

The City of Satsuma presented Mitternight with a beautification award on May 14, 2013 for improvements to the plant and corporate offices. Mitternight began 85 years ago as a fabricator of industrial boilers on the Mobile waterfront, and evolved in the 1960's into a manufacturer of ASME code vessels for Fortune 500 customers in the petrochemical, energy and refining industries worldwide. The Mitternight name is synonymous with innovation, engineering excellence and an intensive customer focus. Mitternight moved its production facility to Satsuma in 1964. Since 2010, Mitternight has upgraded the facility significantly, ranging from landscaping the property, re-paving the parking lot, and upgrading the 65,000 square foot plant. These improvements have enhanced the beauty and environment for the entire community.
