

June 3, 2011

Mr. Mike Estes  
Quality Control Manager  
Midnight Boiler Works, Inc.  
PO Box 489  
Satsuma, AL 36572

Dear Mr. Estes:

This letter is to confirm the unanimous decision of the Joint Review Team on June 1, 2011 to recommend to the ASME the renewal of the "U" Certificate and to the National Board the renewal of the "R" Certificate.

During the review of your Quality Control Manual, there were several revisions agreed upon to more clearly describe your actual operations and to ensure full Code compliance. These revisions were completed in a "MASTER" copy with all acceptance signatures and dates applied prior to the conclusion of the Joint Review. Please ensure the revised manual is distributed to all applicable personnel including our Atlanta office.

The documentation and implementation portion of the Joint Review was concluded without any outstanding items or corrective action required.

I want to compliment you and everyone on the very professional presentation of your fabricating facility and Quality Control Program during the Joint Review.

If you have any questions or I may be of any assistance, please call on me.

Sincerely,

William C. Hunter  
Supervisor
